

PLT's New Energy & Society Program

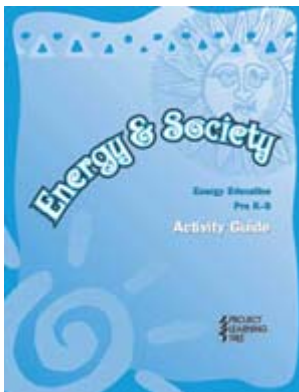

PLT's Energy & Society program provides formal and nonformal educators with tools and activities to help students in grades PreK-8 learn about their relationship with energy and investigate the environmental issues related to energy's role in society. Energy & Society helps students develop critical thinking skills to make decisions about their personal energy use. In addition to hands-on activities, Energy & Society integrates music and dance to enhance the study of energy issues.

[Energy & Society Web Enhancements Gateway](http://www.plt.org/curriculum/gateway/cfm)

Are you looking for more information and additional resources? Would you like to know how other educators are using the materials? Do you have something to share? Enter through this link to get more out of the Energy & Society Kit.

Materials in the Energy & Society kit include the following:

- **Energy & Society Activity Guide:** A background section for educators; an outline of how to use the Energy & Society materials with students; correlations to national standards in science, social studies, and English language arts; a student energy primer; a collection of six activities that educators can use with the Where is the energy? and What powers the move? posters; ideas for action projects and science fair projects; energy-related case studies; a list of energy-related children's literature and other resources; lyrics to the songs on the Billy B CD; and a glossary.
- **Energy & Me music CD:** A collection of 15 energy-related songs from singer/songwriter, Billy B. (The music CD may also be purchased separately through Billy B's website: www.billybproductions.com.)
- **Energy & Me music and dance video:** Billy B and students perform dances to five of the songs from the music CD, and complete instructions are provided for three of the dances

Activity Guide

Music CD

Music Video

- **Energy & Society posters entitled Where is the energy? and What powers the move?:** Visual teaching tools for introducing students to the topic of energy and the issues surrounding it. Each kit includes a set of 8 of each poster.
