

Name _____ Date _____ Per _____

Life on the Edge

Every Species for Itself

My assigned organism: _____

Habitat: _____

Classification: herbivore, carnivore, omnivore

Food: _____

	<u>Large animals</u>	<u>Medium animals</u>	<u>Small animals</u>	<u>Tiny animals</u>
Food - (red/green)	10	7	4	2
Water - (blue)	8	6	4	2
Shelter - (brown)	6	4	2	1
Space (white)	5	3	2	1

Ungrouped:

	Round 1	Survive?	Round 2	Survive?	Round 3	Survive?
Food						
Water						
Shelter						
Space						

Grouped:

	Round 1	Survive?	Round 2	Survive?	Round 3	Survive?
Food						
Water						
Shelter						
Space						

Conclusion:

In which condition was your survival best? (Grouped or ungrouped?)

Explain _____

Was your survival dependent on the type of animals near you? Explain.

Habitat Scramble

My assigned organism: _____

Habitat: _____

Classification: herbivore, carnivore, omnivore

Food: _____

What is the first event that occurred: _____

Are you able to survive in another habitat? Which one? _____

Why? _____

What is the second event that occurred? _____

Are you able to survive in another habitat? Which one? _____

Why? _____

What is the third event that occurred? _____

Are you able to survive in another habitat? Which one? _____

Why? _____

You only represented one animal. What would happen if there were 10 of you? _____

Where do animals that live in a desert biome (ecosystem) get their water? _____

What are some examples of habitat loss? _____

Summarize what you learned doing these two activities:
